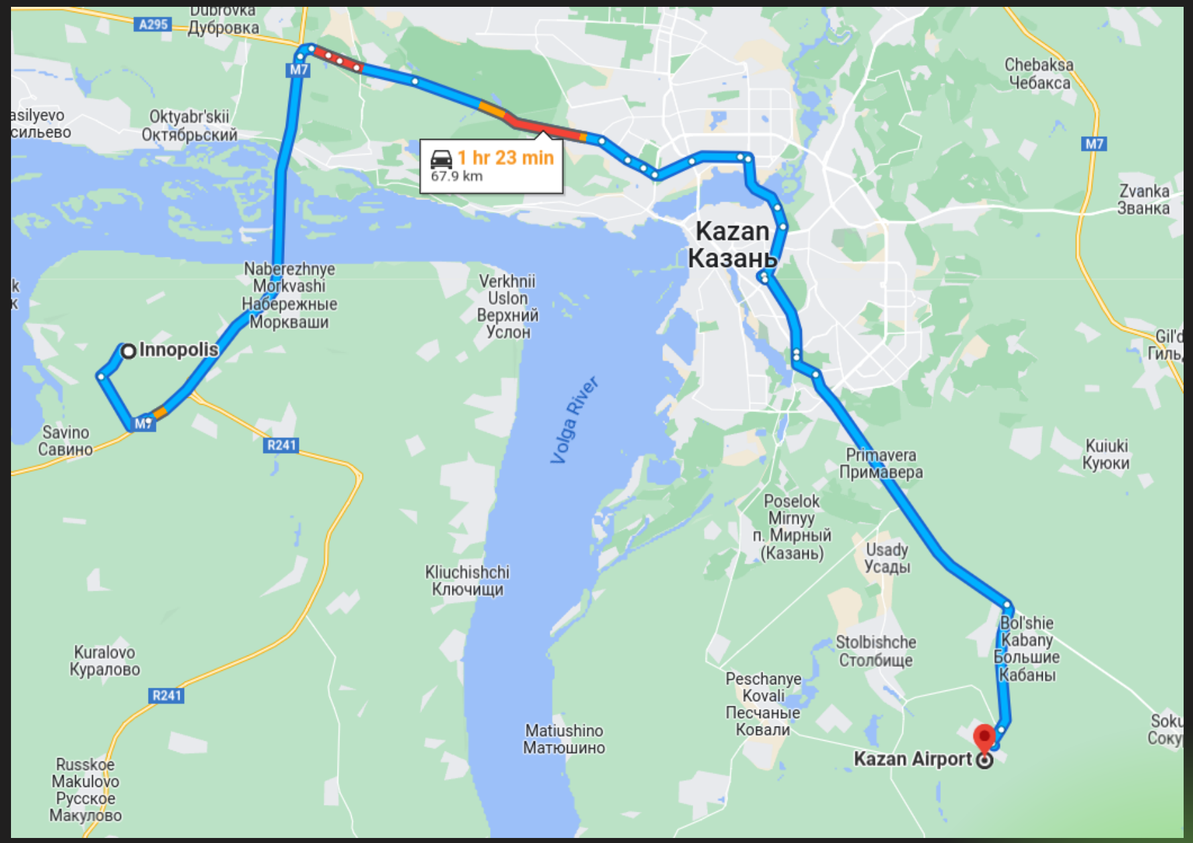
- Payment
- Scaling...

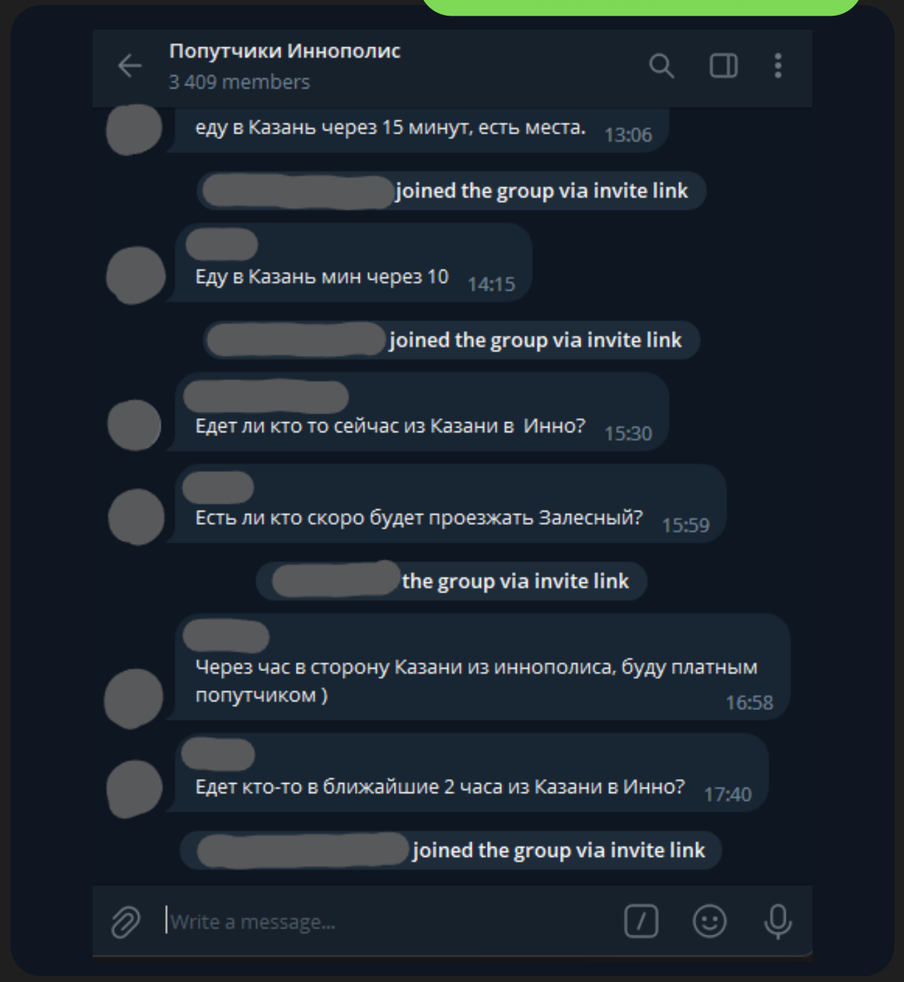
Project's idea

- Find co-travelers
- Save money
- Provide multi-language user interface



Existing solutions

Information



Name

Иннополис Попутчики

Service Type

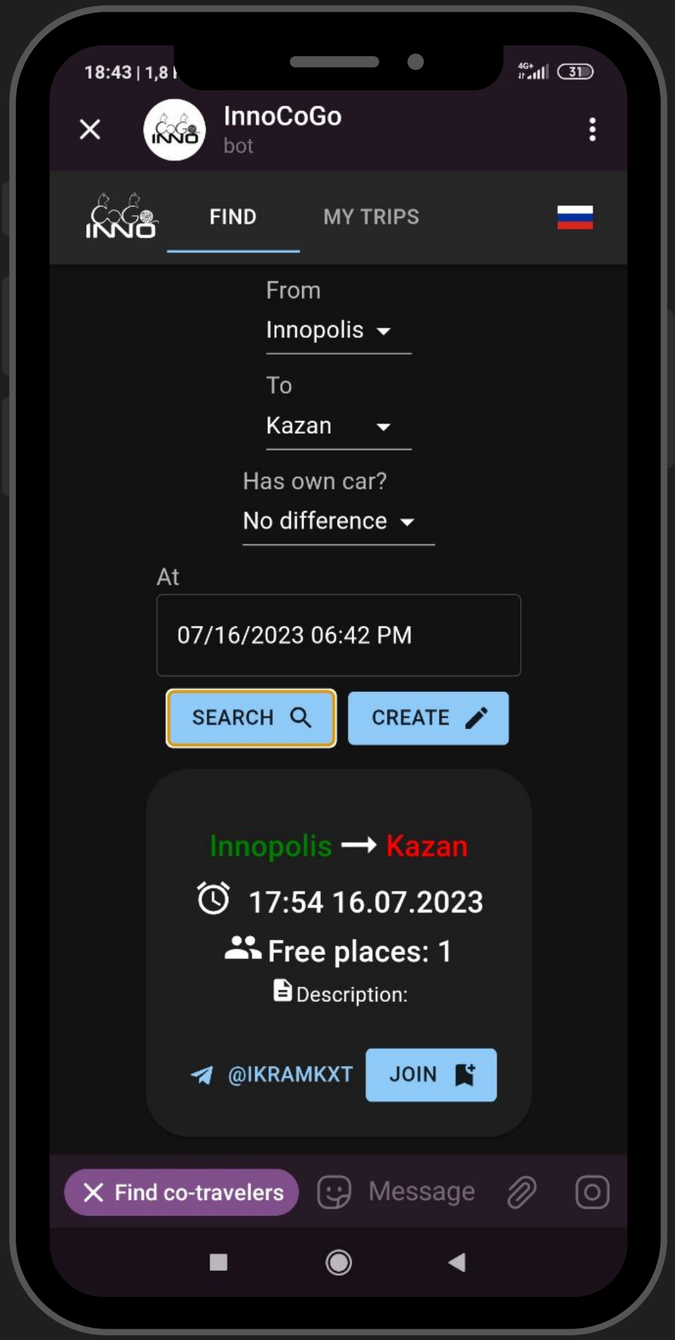
Telegram chat

General information

A telegram chat where people write messages to infrom others about the trips they plan

Our solution

- Telegram bot
  - Starting navigation point
  - Notifications
- Webapp
  - Trip creation
  - Trip filterring & joining



Main differences

- Overall UI is more structurized
- Multi-language support with AI translator
- Personalized notifications about your trips

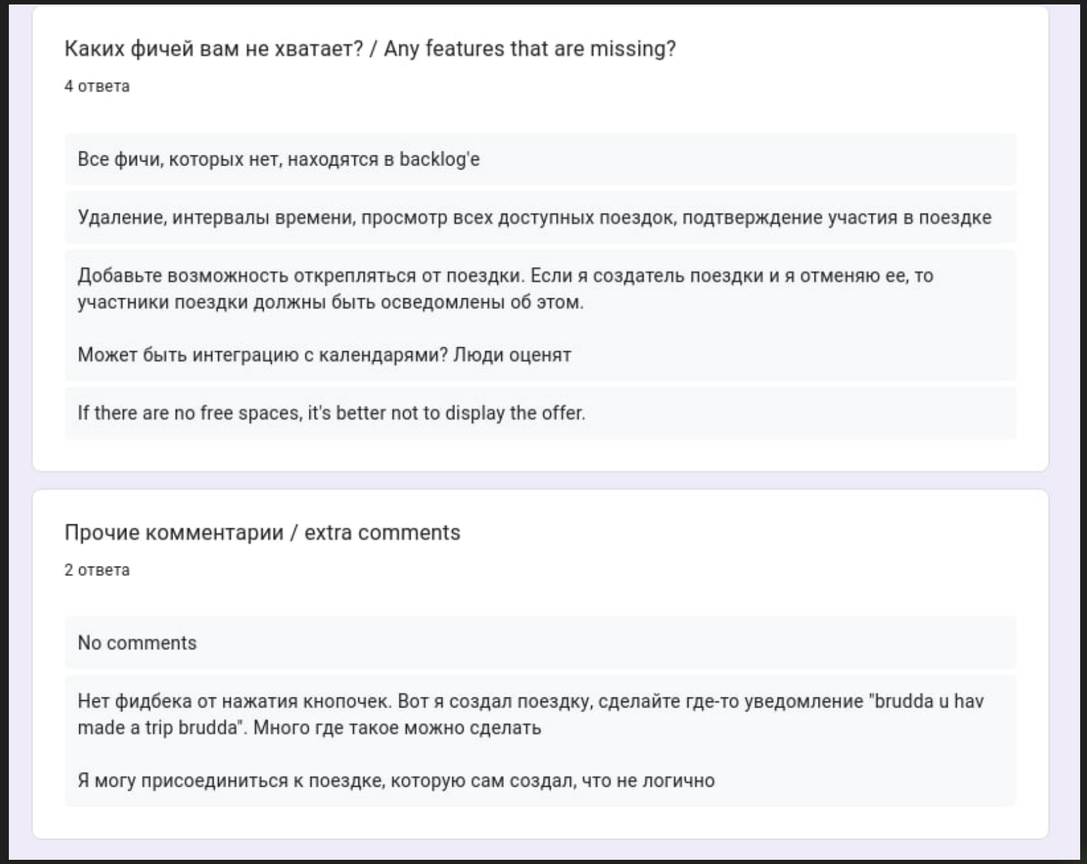
Analyzing feedback

- Got to know about existing bugs
- Got suggestions about new features



Каких фичей вам не хватает? / Any features that are missing?

4 ответа

Все фичи, которых нет, находятся в backlog'e

Удаление, интервалы времени, просмотр всех доступных поездок, подтверждение участия в поездке

Добавьте возможность откреплятся от поездки. Если я создатель поездки и я отменяю ее, то участники поездки должны быть осведомлены об этом.

Может быть интеграцию с календарями? Люди оценят

If there are no free spaces, it's better not to display the offer.

Прочие комментарии / extra comments

2 ответа

No comments

Нет фидбека от нажатия кнопочек. Вот я создал поездку, сделайте где-то уведомление "brudda u hav made a trip brudda". Много где такое можно сделать

Я могу присоединиться к поездке, которую сам создал, что не логично
