The problem

- QR code
alumni.innopo
lis will be
placed here

Graduates of Innopolis University currently lack a unified portal where they can find everything they need. Many universities in Russia and abroad already have dedicated websites for their alumni. Our task was to first understand what our graduates want and need from such a site, and then develop a similar platform to meet those needs.

Functions Considered Most Necessary by Alumni

The top feature alumni want is [guest passes page for alumni](#), so they can access campus facilities and events. They also want [events page](#) just for alumni to help them network and reconnect with old classmates. Another important feature is the [ability to attend elective courses](#), this feature we are going to create in the future.

About us

Nazgul Salikhova - ML developer,

Chulpan Valiullina - ML developer,

Galia Shabanova - backend and frontend developer,

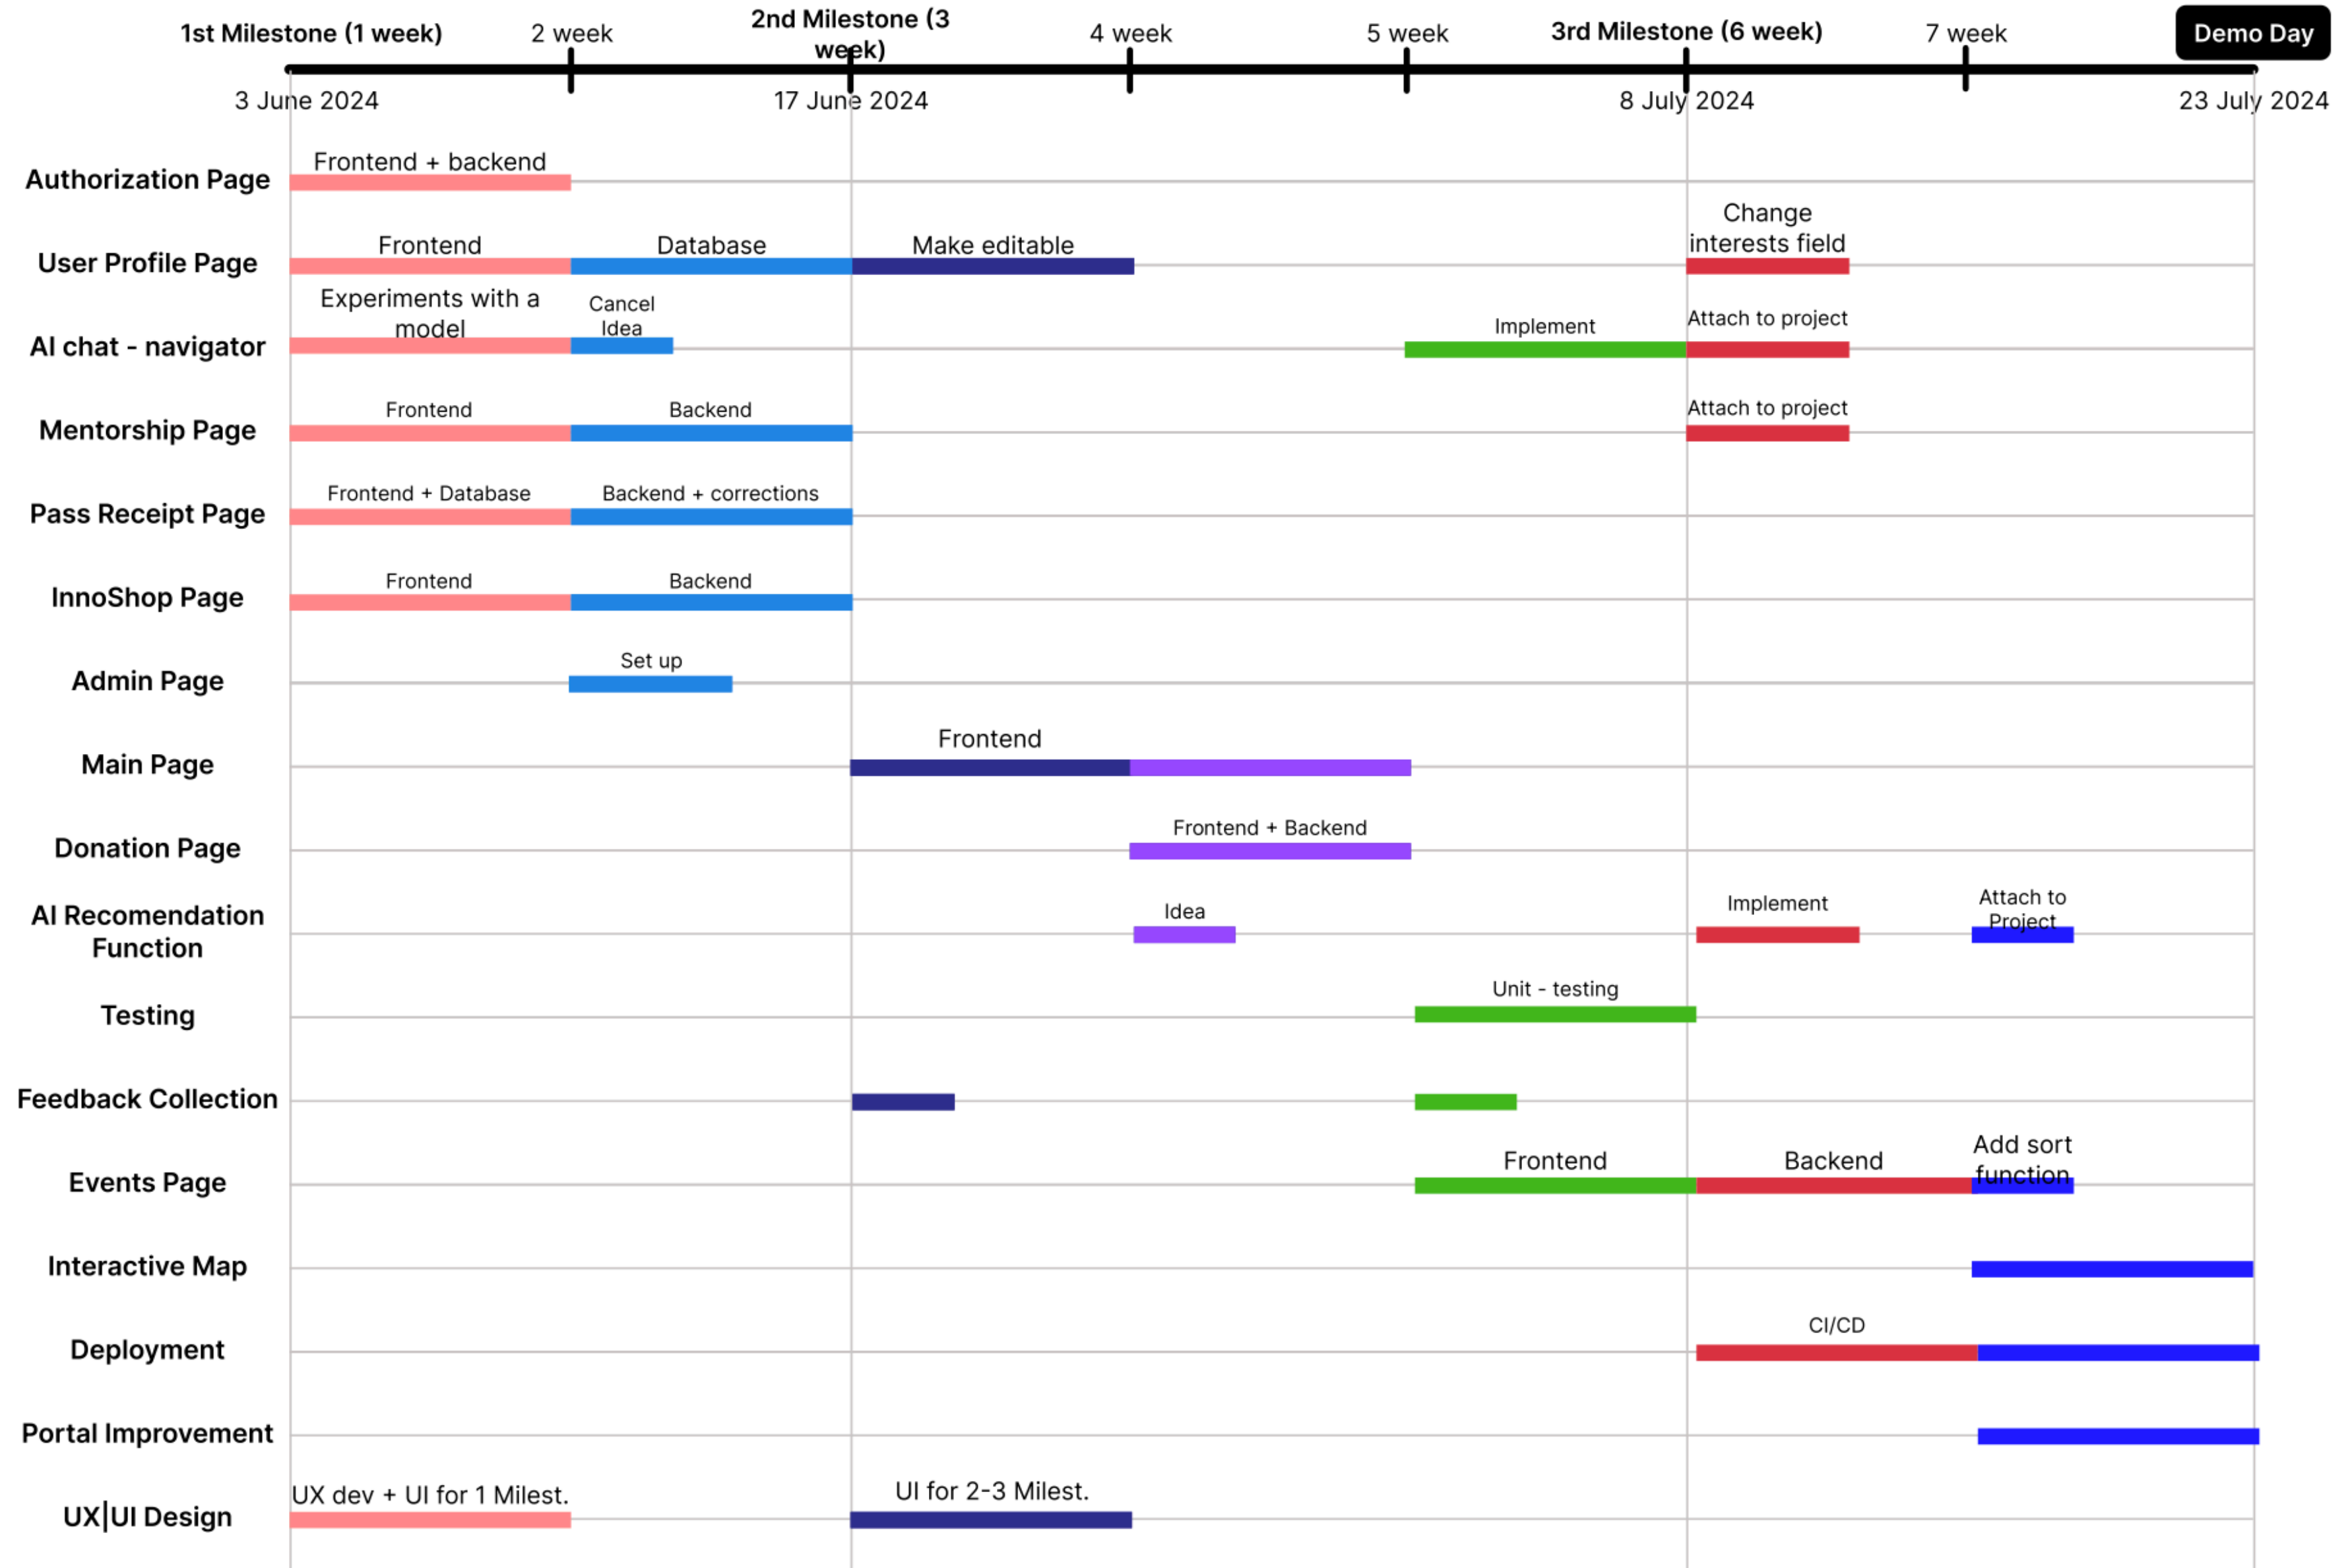

Olesia Grediushko - backend and frontend developer,

Liubov Smirnova - backend and frontend developer,

Anzhelika Akhmetova - backend and frontend developer,

Anastasiia Ozerova - project and product manager

Developing process

The features of our website

Event Page: Stay updated on upcoming alumni events and activities.

Recommendation System: Personalized recommendations for events, courses, and connections.

Mentoring Support Page: Connect graduates with students for guidance and support.

Profile Page: Manage and update your personal and professional information.

Page for Booking Guest Passes: Easily book guest passes for campus visits and events.

Chat for Navigating the Site: Get instant help and navigation assistance through our chat feature.

Purchase Merchandise: Buy exclusive university merchandise.

Map of Graduate Locations: View the geographic distribution of fellow alumni.

Donations Page: Contribute to the alumni fund and support future initiatives.

Future goals

Develop a page where graduates can book elective courses.

Launch our alumni website through the Department of Internal Development at Innopolis University, integrated with the "My University" system.
